No. 6. Income Tax Payable on Incomes Derived by Individuals, 1967-68 to 1971-72

The Commonwealth Government is the sole authority in Australia levying income tax.

This table gives examples of the amount of tax payable on incomes derived by individuals in recent years. The "Actual Incomes" are amounts of income before any deductions of a concessional nature have been made. In calculating the tax payable, no allowance has been made for concessional deductions other than for the dependants indicated in the headings.

(a) Includes contributions under Commonwealth Aid Roads Act, \$937,000.

(b) Cash balance in fund at 30 June 1971 amounted to \$4,354,000.

Note. In terms of the Financial Agreement contributions are paid annually to the National Debt Sinking Fund in respect of N.S.W. debt, as follows:

1. For 58 years from 1 July 1928, on net debt outstanding at 30 June 1927: (a) 0.125 per cent. by Commonwealth, (b) 0.25 per cent. by State.
2. For 53 years on new loans raised after 30 June 1927 (except for revenue deficits): 0.25 per cent. each by Commonwealth and State.

Upon agreement that a loan expended on wasting assets should be redeemed within a shorter period the State's contribution is increased to provide for redemption within the period fixed, allowing for accumulation at 4.5 per cent. compounded.

3. On loans raised to meet a revenue deficit accruing after 30 June 1927:

(a) Special deficit loans incurred in depression: 0.25 per cent. each by Commonwealth and State until 30 June 1944, thereafter for 39 years 0.25 per cent. by Commonwealth and 0.75 per cent. by State.

(b) Other deficit loans: at least 4 per cent., payable by the State, to be accumulated at 4.5 per cent. per annum, compounded.

4. Interest on cancelled securities at the rate of 4.5 per cent.

Additional contributions are paid by the State to recoup amounts appropriated from the Sinking Fund for discounts on conversions since November 1936. The additional contributions are spread over the currency of the conversion loans, and the first payment was made in 1938-39.

No. 21. Loans Raised by Corporate and Other Bodies and Guaranteed by State, 1970 and 1971

No. 36. New Money Capital Raised by Australian Companies, 1963-64 to 1970-71

These statistics relate to new capital raised by companies incorporated in Australia and the Australian Territories, distinguishing between companies listed on the Australian Stock Exchanges (*listed companies*) and all other companies (*unlisted companies*). *New money raised* is the net amount of cash transferred from the investing public to the companies, and consists of the total amount of cash received by the companies less the amounts not involving a transfer of funds from the investing public (cash subscribed by associated companies, and other cash subscriptions used to redeem shares, debentures, etc. or to purchase existing shares, debentures, etc. in other companies). Borrowings by bank overdraft and temporary advances, deposits accepted by banks, insurance and pastoral companies, and building societies, and loans to authorised dealers in the short-term money market are excluded from the statistics.

No. 39. Gross and Net Annual Inflow of Overseas Investment to Australia, and Outflow of Investment from Australia, by Domicile of Investor, 1961-62 to 1970-71

Note. The statistics in Tables 39 to 42 relate to the following annual flows of investment between Australia and overseas countries (including Papua and New Guinea):—

- (a) direct overseas investment in companies in Australia (incorporated and unincorporated businesses);
 (b) portfolio investment in companies in Australia by overseas investors;
 (c) overseas investment in Commonwealth Government and local government and semi-governmental securities; and
 (d) investment overseas by Australian businesses.

Other classes of investment (e.g. investment in real estate in Australia by non-residents other than companies included in the statistics, and loans by non-resident individuals to Australian individuals) are not covered by the figures. Inflows to Australia and outflows from Australia are shown net of withdrawals of investment. Investment income payable overseas is the amount payable out of profits earned by companies (other than life insurance companies) operating in Australia. Complete definitions of the terms used, and further particulars of investment flows, are given in *Annual Bulletin of Overseas Investment: Australia* issued by the Commonwealth Statistician. Many figures have been revised since last issue.

No. 43. Finance Companies: Amount Financed (a) by Type of Agreement, New South Wales (b), 1966-67 to 1970-71

Notes:—

- Statistics of finance companies relate to the lending operations of companies which are engaged mainly in providing to the general public (businesses as well as persons in their private capacity) credit facilities of the following types: hire purchase and other instalment credit for retail sales, wholesale finance, other consumer and commercial loans, and factoring. Companies which are engaged both in financing activities and other activities are included in the statistics if the major portion of their assets relates to financing of the general public (by the types of lending listed above) or if a major proportion of their income is derived from such financial assets. However, companies which are engaged mainly in the financing of their own sales, or in financing the operations of related companies, are excluded from the scope of the statistics. Institutions such as banks, insurance companies, authorised dealers in the short-term money market, pastoral finance companies, investment companies, unit trusts, land trusts, mutual funds, superannuation funds, building and friendly societies and credit unions, and companies (except those related to finance companies as defined above) which are mainly engaged in leasing, or in drawing and discounting bills of exchange, do not come within the scope of the statistics. Also excluded from the statistics are finance companies with balances less than \$100,000.
- The group "non-retail finance businesses", as identified for purposes of the statistics of instalment credit for retail sales (see Table No. 49), does not correspond with finance companies as defined in this section, partly because the former group includes unincorporated businesses, and partly because some finance companies which finance the sales of particular retailers are included in "retail businesses" in the instalment credit statistics.

Accounting practice regarding the inclusion in balances outstanding of unmatured charges, interest, and insurance differs between finance companies and type of agreement, and for this reason the particulars of liquidations of balances given below, and of balances outstanding given in Table 45, distinguish between contracts including charges and contracts excluding charges.

No. 62. General Insurance (a): Premiums, Claims, and Expenses in New South Wales, 1960-61 to 1970-71

Tables 62 to 64 contain selected items of statistics which conform substantially to the following definitions and should not be construed as "profit and loss" statements or "revenue accounts". Premiums represent the full amount receivable in respect of policies issued or renewed in the year, less returns, rebates, and bonuses paid or credited to policy holders in the year; they are not adjusted for premiums unearned at the end of the year and consequently the amounts shown differ from "earned premium income" appropriate to the year. When figures are increasing, premiums receivable (as shown) are greater than "earned premium income" appropriate to the year; the converse applies when figures are declining. Claims include provisions for outstanding claims and represent claims incurred in the year. Contributions to fire brigades, commission and agents' charges, and expenses of management mainly represent payments in the year. Taxation also mainly represents payments in the year, and the amounts included for income tax therefore relate to income of earlier years.
